

VIDEO ALARMS

Wish you could see what happens before an alarm is triggered? Ever wanted to take more screenshots to see more activity?

ActivTrak Video Alarms give you complete visibility into what happened both before and after an alarm is triggered. Video Alarms provide a 30 second clip side-by-side with user information and activity log data so you have complete transparency into what led to an alarm being triggered, and what the user did after the alarm was triggered.

**A Screenshot is worth 1000 words,
ActivTrak Video Alarms offer priceless transparency.**
